We
make
people
happy

JOIN US ON OUR SUSTAINABILITY JOURNEY

Since 1996, we have been guided by a single star: to make people happy. We use atmospheric light to foster myriad benefits for people everywhere, and this is both an expression of our corporate purpose and the centrepiece of our sustainability strategy.

We strongly believe in the philosophy, each action counts. For us, it's natural to act responsibly, honestly, and transparently so that we have a positive impact on people, and to protect the planet we love. Good is not good enough and we are never satisfied. Yes, it is an ongoing journey.

Marie, Klaus and Thomas Mark

PROGANIC *MATERIALS*

BY MK ILLUMINATION

PROganic

for a PROgressive Future

Our **PROganic** materials are an example of how we continue to set the standards for high-quality products and solutions in our industry. We are continuously challenging ourselves and others to improve. Our unwavering commitment to producing world-class products has been and remains one of the key factors in their popularity.

PROganic describes all the motifs that we produce in-house using sustainable materials: recycled or biobased materials.

Using sustainable materials in our products are essential for us and our planet. Because 80% of the CO₂ emissions are released from the production of the raw material. We've been aware of this for decades, which is why we were the first in the industry to launch ORGANIC motifs as early as 2011 with a renewable raw material - biobased content.

This was a breakthrough at the time, but it was only the beginning for us. Over the years, we have continually expanded and developed our ORGANIC family, and that change continues today.

But that's not all. We see sustainability as a continuous journey, which is why we monitor the latest developments and innovations. The result of that development is a new series of motifs made from recycled materials, we call the material REGANIC. We are delighted to introduce you to them.

In the following pages, you'll gain insights about our complete **PROganic** family, which includes our ORGANIC and REGANIC motifs. With an exhilarating variety of colourful designs, you can add atmosphere to your space all year round while minimising your impact on the planet.

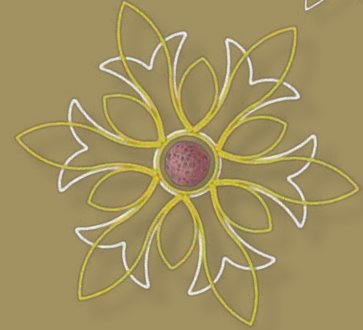

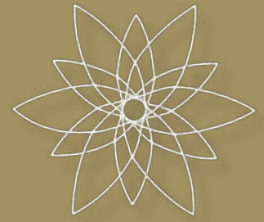

“

PROganic is a new way of thinking when we are developing new materials. We aim for our **PRO**ganic materials to be made of at least 50% biobase or 50% recycled materials.“

Sebastian Aufhammer

PROganic BIOBASED MATERIAL = ORGANIC & ORGANIC PRO

DEFINITION ORGANIC FAMILY

The motifs contain at least 30% of wood, all of which comes from a radius of less than 100 kilometres from our supplier, from PEFC-certified* forestry and timber operations.

In 2023, we started gradually replacing the rest of the conventional plastics with renewable raw materials, and more specifically, from biobased material according to the mass balance approach**. Compared to polymers made from fossil raw materials, this new material has a lower CO₂ footprint. The raw material come from biobased waste and do not compete with the food chain and the material is manufactured in Europe.

Thanks to a new manufacturing process, we can also produce entire ORGANIC PRO motifs from a single cast without relying on additional aluminium constructions. This also contributes to a more natural appearance throughout. The bottom line?

The ORGANIC motifs stand out because of their environmentally-friendly materials and natural appearance, adding to their visual appeal.

The constant innovation and expansion of the range have resulted in saving many tonnes of plastic over the years.

PROganic RECYCLED MATERIAL = REganic

DEFINITION REganic

Each motif in our new **REganic** family is made from 50% recycled polymer*. Recycling means using materials that would normally end up as waste and transforming them into new, useful products.

By using recycled materials, we are actively reducing waste and promoting the conscious use of resources.

We manufacture all **REganic** motifs from a single piece of material using an innovative 3D printing process. This gives them a seamless appearance and uniform structure and guarantees maximum stability and precision in every detail.

Thanks to the variety of shapes and colours, the different elements of the **REganic** motif family can be combined as desired and individually adapted to their surroundings.

Whether you opt for bold, solid colours or translucent designs that allow light to shine through, this range offers countless possibilities to make spaces so attractive that people will want to visit and linger.

Recycled material

HIGH-QUALITY MOTIFS

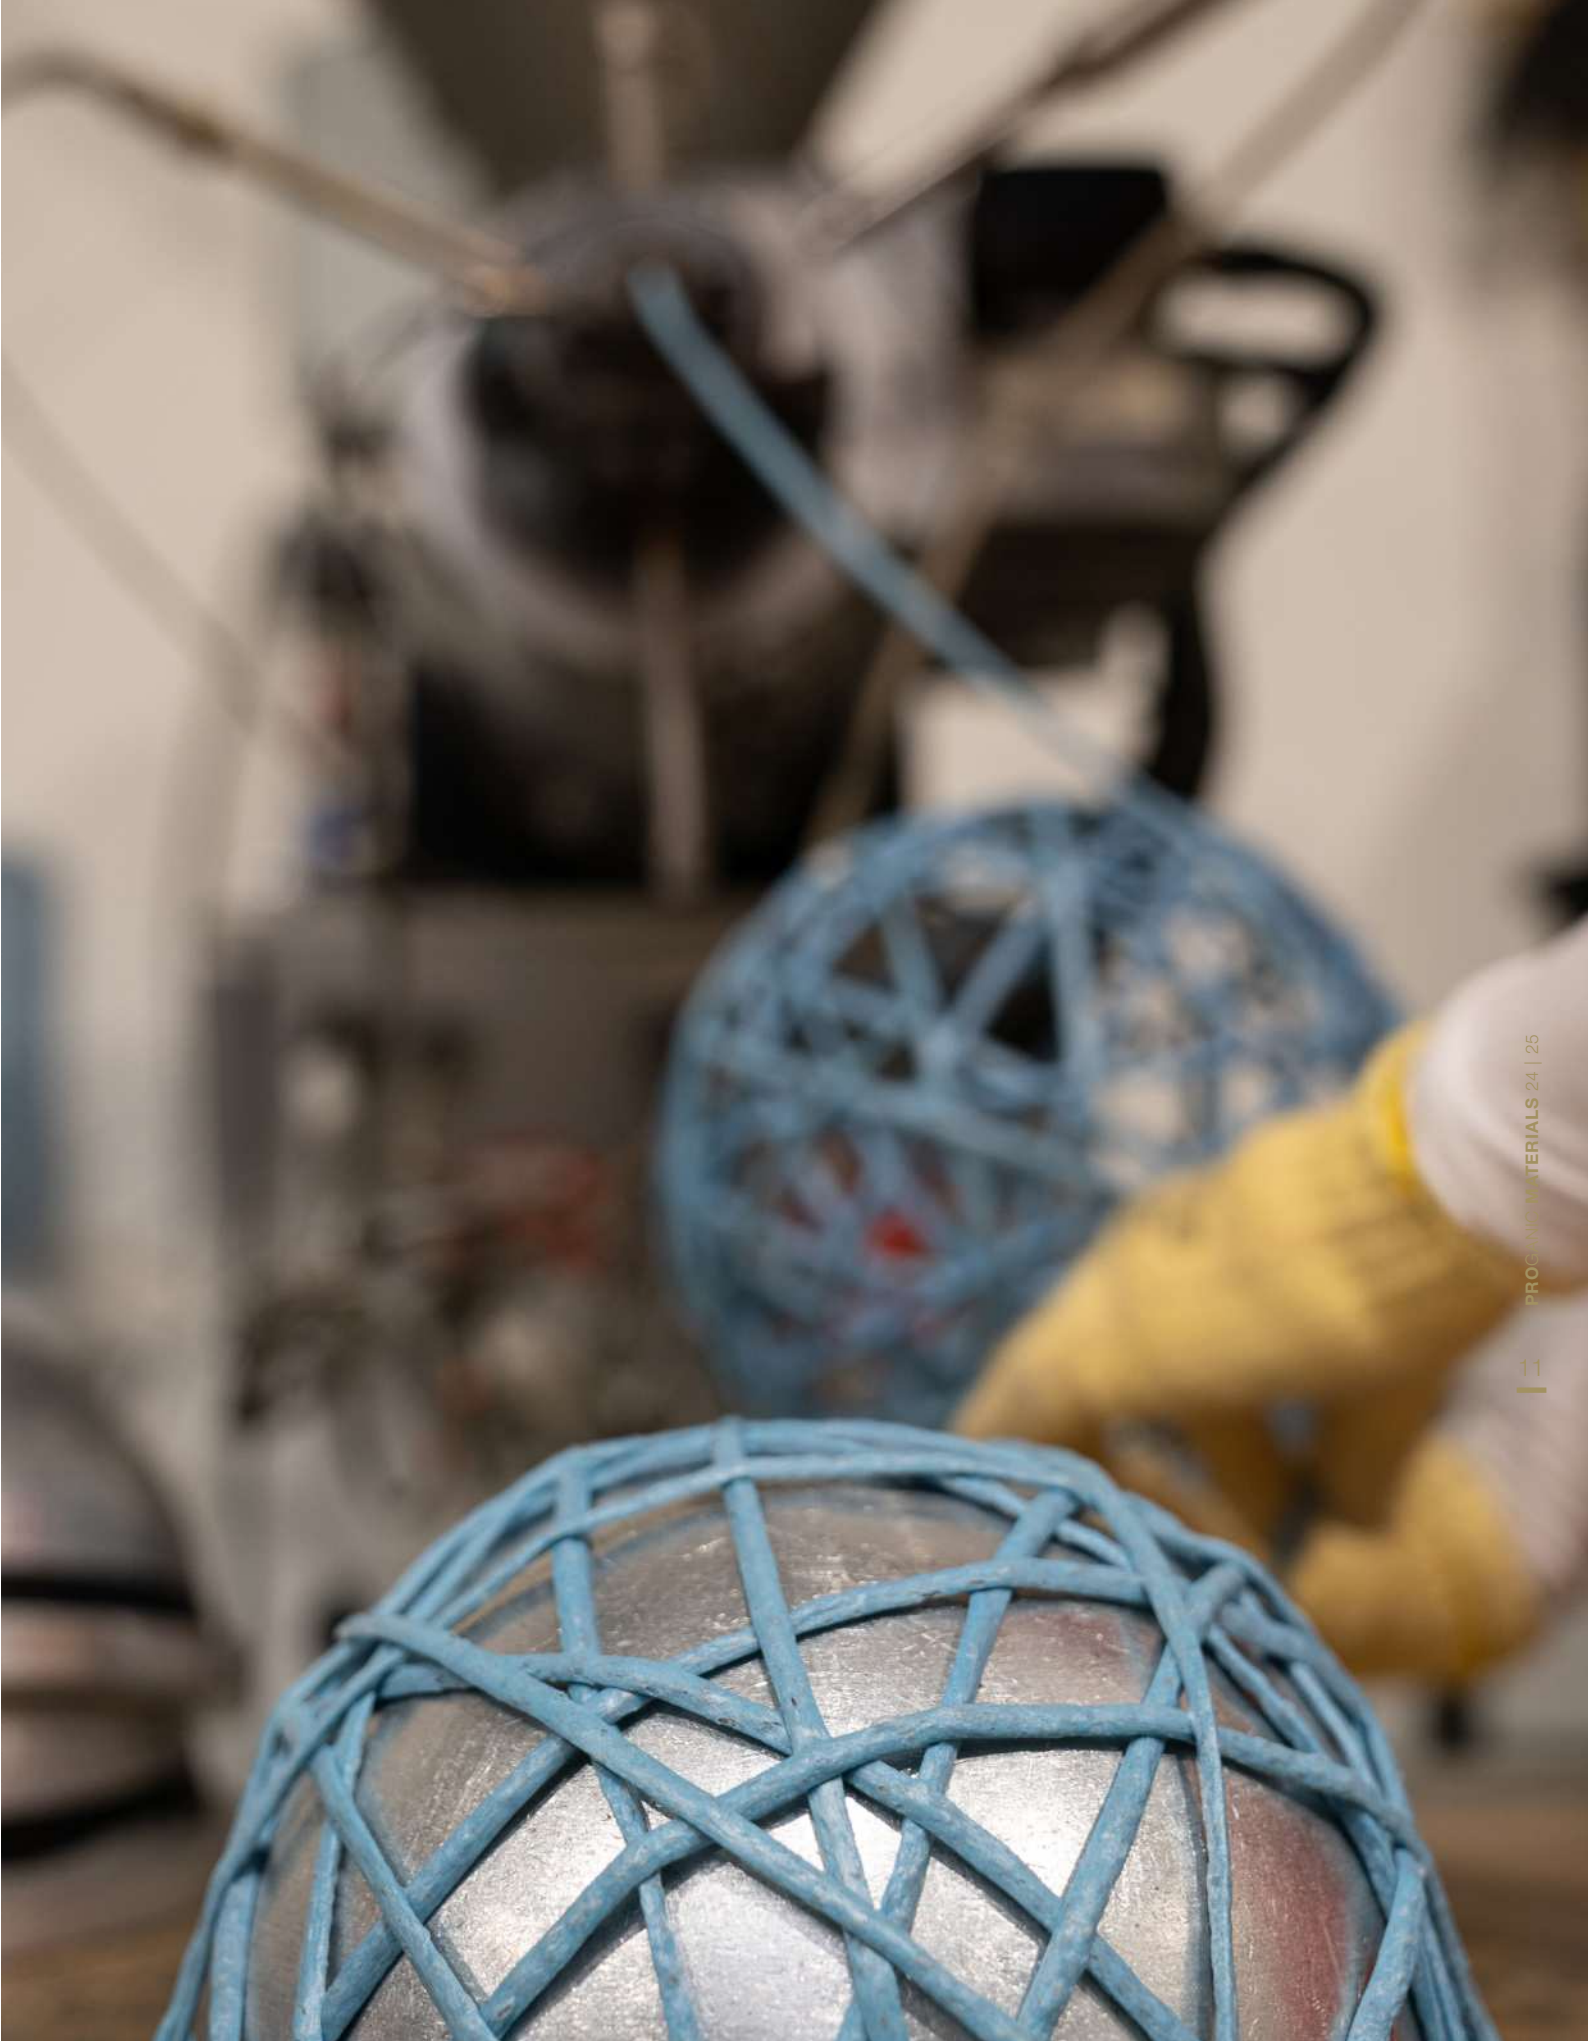

Producing high-quality motifs is skilled work that demands care, patience, and many steps, most of which involve manual intervention. This results in stand-out pieces that appear in locations around the globe, where they engage and delight people for many years at a time.

HANDCRAFTED PERFECTION

We manufacture our high-quality motifs from the **PROganic** material in our MK Illumination-owned manufacturing facilities.

This means that we are manufacturers and not just retailers, which sets us apart from others in our industry. We have the freedom and opportunity to develop the technical aspects of our products continuously and turn in-house design ideas into high-quality and unique motifs, all whilst being able to guarantee compliance with the relevant safety standards and norms per European standards. In our production facilities, we ensure that our employees have appropriate safety and labour protection and are fairly compensated.

We produce the majority of our **PROganic motifs in our certified manufacturing facility in Prešov, which covers an area of 9,000 square metres. In line with our BUY SMART standard, quality, safety, efficiency and sustainability are of the utmost importance.**

THE ART OF DESIGN

Combining beauty, creativity, and unparalleled quality

Our design teams harness their passion and creative flair to create products and design worlds in which light takes centre stage all over the world, on any scale, for any occasion. Located in London, Stockholm, New York, Seoul, Taipei, Mexico City, Turin or Innsbruck, our creatives keep their fingers on the pulse of current trends, whilst staying mindful of local needs.

Through inspiring working partnerships, collaborations, trend-spotting and tracking innovative technological developments of new sustainable materials, we are driven to constantly innovate our designs and products. We only consider our products and lighting design to be „stage-ready“ when they meet our demanding BUY SMART criteria that ensure legality, safety, efficiency and sustainability.

We don't simply light up spaces. We create atmospheres that are designed to make people feel welcome and evoke positive emotions."

Klaus Mark
CEO MK Illumination

”

Reusable and high-quality decorative elements reduce waste and conserve resources.“

Sebastian Aufhammer
COO MK Illumination

CREATE MOMENTS OF HAPPINESS - 365 DAYS A YEAR

Combining beauty, creativity, and unparalleled quality

Life is about big and small celebrations. Our wide range of motifs makes it easy to adapt to traditions, special occasions and to follow the seasons.

For example with a few decorative elements, the Paradise Tree can be transformed from a festive Christmas tree into a warm Valentine's Day tree, a blossoming Easter greeting or a summery eye-catcher with colourful motifs. In autumn, our organic Halloween motifs decorate the tree and create an eerily beautiful atmosphere.

PROganic

It's all about the colours

The **PRO**ganic materials have a wonderful effect by day and by night.
These are our standard colours of the respective material.

ORGANIC

ORGANIC PRO

REGANIC

REGANIC TRANSLUCENT

The background of the entire page is composed of numerous thin, dark green lines. These lines are drawn in a somewhat chaotic, hand-drawn style, crisscrossing the entire frame. Some lines are straight, while others are curved or slightly wavy. They vary in length and orientation, creating a complex, web-like pattern that suggests movement and interconnectedness. The lines are set against a plain white background.

Enlightening your vision.
